# Food Processing Inspection

Automatic food processing inspection systems have been rapidly growing in recently years. There's no need for extra concern, our inspection systems are not only safe but easy to operate. With the products below, featured in stainless steel 316, the corrosion resistance of your equipments shall be increased. On the other hand, the true flat panel design enables you to maintain and clean the products fluently, while the anti bacteria protection servece enhances food safety efficiently. More benefits and less trouble, in short.

Application Scenario

X-Ray Detection and Inspection Systems

Metal Detectors

Checkweighers

## Equipment Maker

Metal Detectors

Checkweighers

Product Benefits

Stainless Steel 316
▼
Corrosion Resistance Increased

True Flat Panel
▼
Easy to Clean

Anti Bacteria Protection Service
▼
Enhance Food Safety

- Stainless Steel 316, increased corrosion resistance
- True Flat Panel Design, Easy maintained and cleanness
- Panel Mount Design, Easy installation in equipment
- IK07 level Explosion-proof membrane Service, prevent chunk glass Food Pollution
- Anti Bacteria Protection Service, for food safety issue
